

## INSTRUCTIONS AND INFORMATION

# Graffiti

Removing scuff marks and graffiti made easy

The super hard surface of UV Supershield makes it almost impossible for graffiti to penetrate the surface. Especially good in areas that are tagged and hit repeatedly. Contains UV absorbers to prevent fade or chalking.

### INSTRUCTIONS

- Clean surface as you would for any paint or coating
- Apply two coats of UV Supershield. Apply second coat when first coat is tack free.
- Allow 7 days cure time before putting into service or graffiti protection.
- Will dry in 30 minutes.
  
- Be sure to add 120 mls per 4 litres (4oz crosslinker per gallon)
- Mix in for 2-3 minutes before it is ready for use.
- Pot Life: 3-4 hours
- Mix in slowly for 2-3 minutes.

### PLEASE NOTE

Remove graffiti as soon as possible.  
Shadows will disappear with cleaning.

Product will maintain a high gloss for 20-30 years and can be re-coated
