

UV SUPERSHIELD OTHER USES

Metals

UV Supershield has solved problems in many industries and applications. Due to its unique benefits, the water works industry for example takes advantage of the superior corrosion resistance by coating T-head bolts for underground service. Stainless steel fasteners, used in many different industries, are coated for lubricity and anti-galling operations and maintenance departments and contractors at many chemical plants, refineries and offshore platforms. The coating's chemical resistance and easy on/easy off characteristics are perfect for these environments.

- Oxygen Service

- Phosgene Gas Lines

- Boiler Rooms

- Monochlorobenzene

- (MCB) Formaldehyde

- Aniline

- Anhydrous HCL

- Water Lines Insulated

- Piping Non Insulated
